

## ERGONOMIC CONCEPTS®

### ECI-7915

#### Features & Benefits

- Each head is completely and independently adjustable: 180° of Tilt, 180° of side-to-side movement, and 360° of landscape to portrait movement.
- Clamp Height Adjustment to accommodate various user viewing positions (16" pole allows for 13" of height range)
- Support Clamp doubles as a cable manager and assists in setting and maintaining the desired monitor height.
- Double Extension models allow for 19" of back and forth movement to allow for different levels of viewing comfort. Arm almost completely folds back to the post to create more desk-space.
- 360° arm swivel around base to increase flexibility of position of monitor
- Desk Clamp and Grommet Mount hardware are both included in each package to minimize SKUs.
- Parabolic model accommodates from four to eight screens for viewing ease of multi-screen use.
- Patented Quick Connect Feature allows Monitor to be easily mounted to the arm and is also a theft deterrent because it requires a tool to disconnect.
- Clamp & Grommet mount adjustable (.75 to 2.25") to fit majority of desks and work surfaces.
- Built-in Cable Clips on underside of extension arms and on pole base allow organized cable management.
- Aluminum Diecast components provide arm with stability and durability to accommodate flat panel screens of up to 21".
- Standard 75mm VESA compliant mounting bracket with 100mm-bracket adapter kit to mount to majority of flat panel screens.
- Aesthetic, sleek design to integrate into any workstation.
- Available in stylish Black or Silver powder paint finishes.
