**DISCOVERY BACK DESIGN BENEFITS** The special pear-back design of our Discovery Back series is designed specifically to address unhealthy seating postures. With a cut-away design to allow for full rearward travel of the scapula, DB chairs can help users who sit for long hours to develop habits for a healthier back.

**SCAPULAR IMPEDENCE** When reclining against a traditional backrest the shoulders are restricted from their full range of motion. This restriction of motion is referred to as scapular impedance, a condition that impedes the full range of motion and prevents beneficial stretching.

**THE 'HEALTHY BACK' DESIGN** According to the ergonomists and chiropractors with whom we have consulted, when people are seated in a chair with a full, 'normal' backrest, the body has a natural tendency to hunch forward. This predilection towards 'scrunching' is - with near uniform agreement - recognized as an unhealthy position for the human body to remain in, especially when seen in prolonged seating situations.

**NOTES**

When upholstered in OM Comfort Knit Solids or Matrix fabrics, DB Series back shells are upholstered in a high double-rub black fabric unless otherwise specified.  
 Adding adjustable lumbar is an option on any DB Series model except for the DB52, DB53 or DB64.  
 DB64, DB68, DB74, DB78, DB92 and DB96 are rated for 300 lb. weight capacity.

Please see pages 40-47 for arm kits, casters and options. • Above weights do not include optional arm kits. • UPS weight is calculated using UPS dimensional standards to determine billable weight. • Pricing and specifications subject to change without notification.
